

0 500m

In summer, hundreds of **black-headed gulls** and **common terns** nest on the islands. Watch the action!

Join the **Ouse Valley Way footpath** here to reach the meadows at Berry Fen.

Reedbed creation is in progress here. Every year up to 500,000 cubic metres of earth are moved to extract the sand and gravel and create the new wetland.

Over 130,000 reeds have been planted in the first 20 years of the project.

There are a series of raised viewpoints on our trails for great views over the pools and reedbeds.

Needingworth quarry, the largest in eastern England, produces up to 1,000,000 tonnes of sand and gravel each year.
